

Summary:

- 5+ years of object-oriented programming knowledge and experience in developing Professional Web applications, Mobile applications and Enterprise solutions using Web Technologies.
- Expertise in modern web architecture using various advanced JavaScript frameworks.
- Strong Experienced in React JS.
- **Experienced in NextJs SSR.**
- **Isomorphic ReactJS.**
- **Experienced in RXJS6, Epics, Promises, Redux observable to handle redux side effect.**
- **Experienced in Storybook to develop reusable components.**
- **Experienced in Material-UI, Ant design, etc.**
- **Experienced in setup project from scratch with Webpack.**
- **Experienced in React hooks, Lazy loading, dynamic import, etc.**
- **Experienced in unit testing using JEST.**
- **Experienced in Node JS, Express JS etc.**
- Working experience on **ES5, ES6, ES7** and **Typescript** features for handling asynchronous data requests.
- Experienced in building cross browser compatibility applications using **HTML5** and **CSS3**.
- Hands on expertise on **Redux, Webpack JavaScript** based applications
- Good experience on customizing **CSS frameworks** like **Bootstrap** and Foundation using CSS pre-processors LESS or **SASS** and Compass.
- Good Experience in **React.js** for creating interactive UI's using One-way data flow, **Virtual DOM, JSX, React Native** concepts.

ACCOMPLISHMENT:

Awarded 1st rank gold medal in Master of computer application (JAIN UNIVERSTIY – BANGALORE).

Awarded 1st rank in inter college coding and programming computation (JYOTI NIVAS COLLEGE – BANGALORE).

Awarded 1st rank in inter college web designing computation (BMEF– SURAT).

EDUCATION:

Master's in Computer of Application from Jain University Bangalore, 2019

Bachelor's in Computer of Application from Bhagwan Mahavir college Surat, 2017

PROFESSIONAL EXPERIENCE :

Client: Publicis Sapient – Full time

April 2022 to Present

Role: Senior Associate, Experience Technology Level 1

Responsibilities:

- Worked as a Frontend Engineer (React + Node.js) to help build and scale the online grocery shopping websites for the UK, Central Europe and the Asia Pacific businesses.
- Helped build a new delivery system for lightweight products in Thailand using mopeds on-demand within an hour. This helped the business beat the traffic in congested cities and also stay ahead of the competition trying to launch similar delivery systems
- Worked extensively on the interactive Bing Maps component that is used by thousands of users to book their light delivery orders on demand.
- Developed a third-party courier-based delivery system of essential groceries in a box for vulnerable and remotely located customers in the central European countries.
- Worked as a MEAN (MongoDB, Express, AngularJS, Node.js) developer and helped build Identity, Access and User Management products that ran on the web platform.
- Helped develop an interactive admin dashboard for a product that provides secured privileged account access to databases, applications, and cloud environments. Added reporting and compliance features to it.
- Built a Google Chrome browser extension that could interact with web forms for providing enterprise single sign-on using an existing Identity & Access Management product. This saw an increase of Google Chrome users among the customers who had purchased the suite.

Client: OKRs @fitbots – Software, Certification & Coaching

Sep 2018 to April 2022

Role: Senior Software Engineer

Responsibilities:

- Involved in designing and developing the web pages using HTML 5, SASS, React JS, Redux, Node JS, CSS, Type Script, Java Script, Bootstrap, Node.js, NPM.
- Developed a front-end web application in React JS, Redux, Bootstrap, ES6/Babel and Webpack.
- Use React JS to create more responsive webpages, which can be compatible with all the browsers and compatible with the different devices.
- Developed reusable component by using story book.
- Server-Side Rendering using **Next.js**.
- Whole application setup with webpack including react JS, Nextjs, redux.
- Developed middleware for react/redux app using redux saga.
- Developed the component by using typescript in react JS.
- Developed Single-page Responsive web pages using HTML5, React, Twitter Bootstrap, CSS3, JavaScript and jQuery.
- Developed user interface by using the React Js, SPA development.
- Implemented Reusable components with React, Styled components and context API.
- Worked on Redux with React to handle large chunks of data for the better performance.
- Implemented highly scalable micro and macro components with React 16.x.
- Implemented React container and presentational components (as Stateless and Functional components when applicable)
- Implemented stable React components and stand-alone functions to be added to any future pages.
- Used React JS for templating for faster compilation and developing reusable components.

Environment: HTML5, SASS, React JS, NextJs, Redux, Material-ui, Ext JS, Node JS, AEM, jQuery ,Data JIRA

Client: Freelancer

May 2018 to Jun 2019

Role: Full stack developer. (React | Angular | Node)

Working with a variety of clients and setting up several projects from the ground up, as well as building responsive layouts using a mobile-first strategy.

Summary:

- Involved in interacting with Application Development Manager in the analysis and estimation of future work and interacting with Architects on the design and architecture for our team's deliverables.
- Create custom components by from source code for bootstrap component
- Compiling SASS components to CSS components
- Used Bootstrap and Media Queries to create Responsive Web Design (RWD) and worked with CSS3 preprocessors such as SASS, LESS.
- Integrate Redux to manage data and added custom navigation views using React Navigation
- Used React.js in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope.
- Used Redux-Store for storing state of the React Application and worked with middleware for the Redux-Store.
- Proficient at using React JS to render some advanced components on the server side, along with Flux pattern and Redux (RXJS) library.
- Added new features using React/Redux (RXJS) for functionality of few modules.

Environment: HTML5, CSS3, JavaScript 1.8.x, jQuery 3.2, Restful Web Services, JSON, MongoDB, Node.js, express JS, Ext JS, Jasmine, karma, GIT, Scrum, Agile, WebStorm, React.js 0.14, Redux3.6.0, Bootstrap, Amazon Web Services.

Client: Sample trunk.

Feb 2018 to April 2018

Role: Frontend PHP CodeIgniter .

Responsibilities:

- Involved in interacting with Application Development Manager in the analysis and estimation of future work and interacting with Architects on the design and architecture for our team's deliverables.
- Used Bootstrap and Media Queries to create Responsive Web Design (RWD) and worked with CSS3 preprocessors such as SASS, LESS.
- Performed functional, unit, regression and integration testing.
- Used JavaScript framework like Jasmine for behavioral testing which is independent.
- Developed the user interfaces of the application using HTML Controls.
- Provided client-side validations using Form validation.
- **Led the development of the product's visualization-based analysis interface, taking it from concept to prototype to customer-ready product.**
- Performing penetration testing on web application

Environment: PHP, HTML4/5, CSS2/3, JavaScript, jQuery, Cookie, JSON, RESTFUL.

Client: Kakshi Infotech.

Nov 2016 to April 2017

Role: C# .Net Developer.

Responsibilities:

- Analyzed business requirements, participated in technical design, development, and testing of various modules assigned.
- Used jQuery to make the HTML, DHTML and CSS code interact with the JavaScript functions to add dynamism to the web pages at the client side.
- Worked with Agile software lifecycle methodologies. Create design documents when and as required.
- Enhancement of existing application utilizing, Created HTML navigation menu that is role-based menu items changes dynamically, derived from the database in the form of XML.

- Enhanced user experience by designing new web features using MVC Framework like node.js.
